NEW New templates for office organisation

Whether you need a quick and easy solution for shipping and mailings, require help when creating professional presentations or simply want to re-organise your office - our products are the perfect support!

NEW New templates for inventory labelling

Whether inventory or property labelling, industrial safety inspection or labelling of hazardous goods we offer you versatile print templates for your requirements.

NEW New templates for a creative home

A great trend: Do it yourself! Transform your home into a feel-good area with our large range of great new and trendy designs - e.g. turn your home-made jams into trendy looking, special presents.

Important Information always perfectly and clearly presented

NEW Inventory labels and inspection labels

Property labelling? Inspection labels for the health and safety protection?
No problem! The new Avery Zweckform labels are the solution

Approved service in accordance with regulations:

Inspection labels on machines, devices and installations document all relevant health and safety regulations and show when the next inspection date is due

Property and security labelling for company property - quick and reliable with our new inventory labels.

Special materials for every application

Labels with lamination:
Labelling is particularly protected thanks to the lamination

Polyester film:
Weatherproof and extra hard-wearing

NoPeel™ film:
Disintegrates into small parts when removed - tampering attempts immediately obvious

Aluminium film:
Labelling engraves into aluminium material

Anti tamper film:
Leaves behind striking pattern when being removed

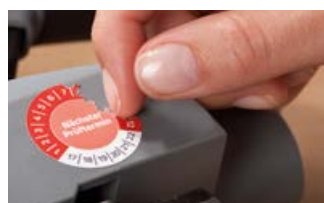

Vinyl:
Extra hard-wearing

NEW Print your own inspection labels

Individual, professional and flexible:

Print only the amount of inspection labels you require!

NoPeel™ film:

Disintegrates into small parts when removed

Removable film:

Leaves no residues behind

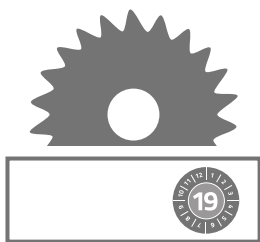

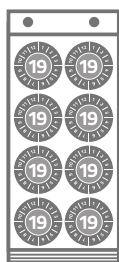

Anti tamper film:

Leaves behind striking pattern

WHICH INSPECTION LABELS DO YOU NEED?

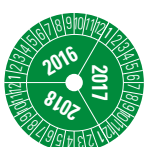

pre-designed **or** design yourself

By the way: print own labels:

Avery Zweckform also offers **free software templates**, in order for users to design their own, specified inspection labels.

Printing Tip **FREE Templates & Software**
avery-zweckform.eu/print

The Paper makes the Difference.

Improved readability

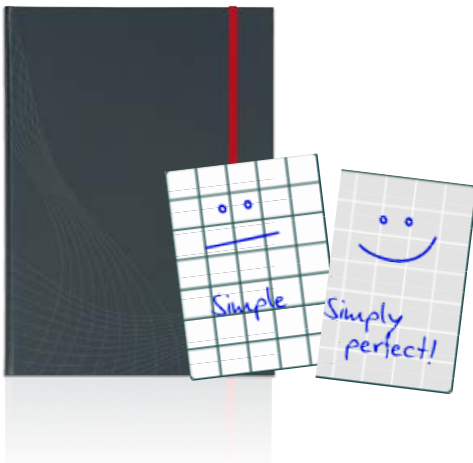

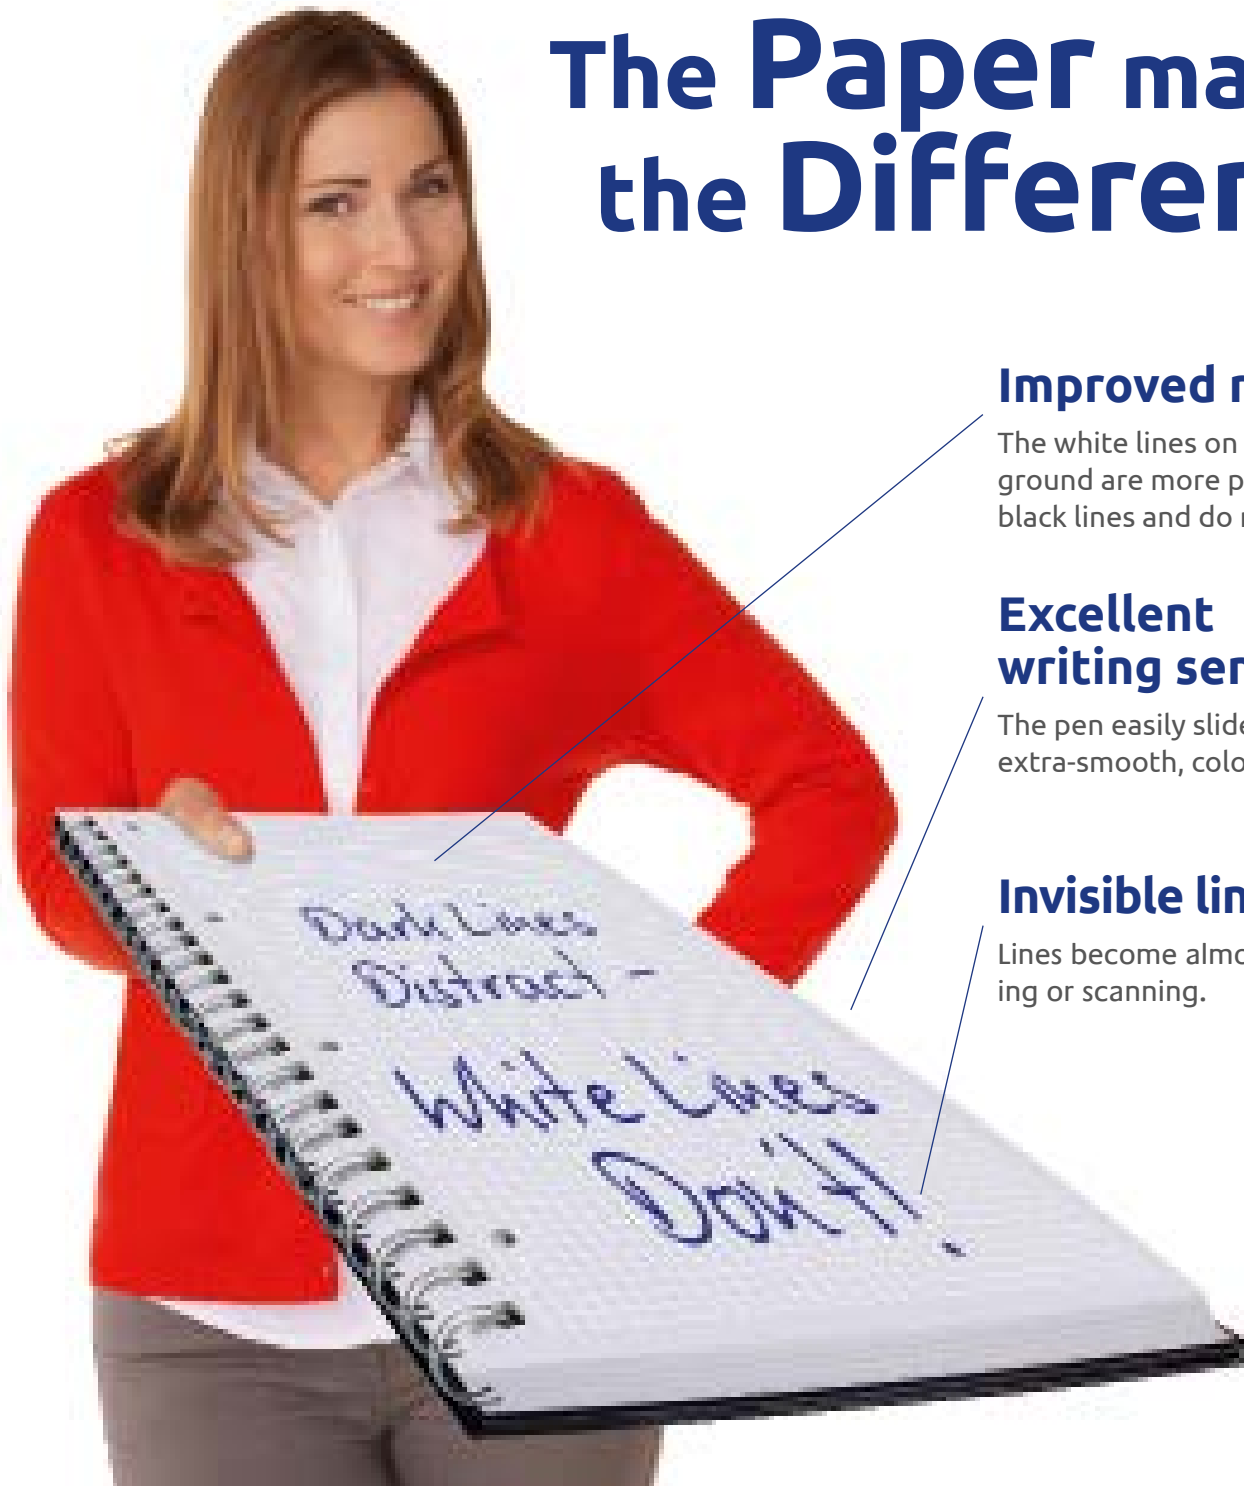

The white lines on the light grey background are more pleasing to the eye than black lines and do not distract.

Excellent writing sensation

The pen easily slides over the extra-smooth, colour fast 90 g paper.

Invisible lines

Lines become almost invisible when copying or scanning.

Experience a completely new writing sensation. The lines in notizio. notebooks are white instead of black and allow you to concentrate on what's important - your notes.

Quality that keeps its promise.

AVERY[®]
Zweckform

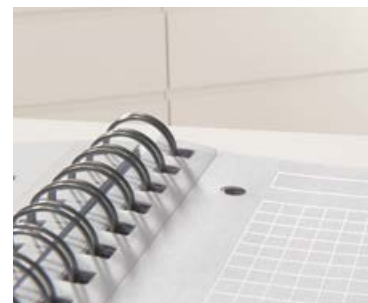

notizio.

WIREBOUND NOTEBOOKS 10

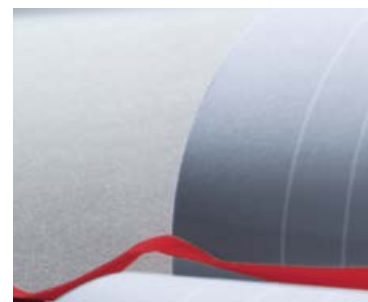

The wirebound notizio. notebooks are extra flexible and functional thanks to the re-positionable indexes and the micro perforation. Ideal for different project notes all in one book. Choose between soft PP material cover, sturdy hard-cover or thin cardboard cover. Also perfect on the road!

CASEBOUND NOTEBOOKS 11

The casebound notizio. notebooks are ideal for projects and sequential notes, the high quality binding lies flat when the notebook is opened – for an extra comfortable writing sensation. Choose between smooth soft cover or sturdy hard cover.

Enter text – print – done!

LABELS

QUALITY PROMISE

QUALITY – WITHOUT COMPROMISES

We research and produce labels, we control and secure our quality and set standards in the market. That's what we stand for since 1935. Learn more about the quality of the products from Avery Zweckform now.

This quality is verified by external seals of approval:

These labels have been tested and certified by TÜV SÜD for trouble-free printing on laser printers.

Recycled labels are made of 100% recycled paper, conserving the environment and climate.

This logo labels FSC® certified products. The top label material comes from responsibly managed forests. The labels can be recycled with specified paper waste.

Das Zeichen für verantwortungsvolle Waldwirtschaft

AWARDS – INCENTIVES & CONFIRMATION

Avery Zweckform has been awarded as “Brand of the Century” in the category labels for the second time in a row and belongs to the German brand- “Stars 2016”. This is incentive and conformation enough for us to continue the successful path of the brand!

ANNA'S TIP!

Labelling filing trays.

Label your filing documents in a clearly structured way. To achieve this we recommend removable labels. The positive effect: you can try different ways until you have found the perfect system working best for you. You can also easily change or adapt categories and classifications any time you want.

Removable labels will help you with that.

Professional and Creative Labelling of Folders

Reliably Strong Adhesion

The special adhesive ensures reliable adhesion for over ten years.

Absolute Opaque

The additional coating on the back of the labels will completely cover old writing and labelling.

Jam-free Printing

The heat-resistant adhesive and our QCT prevent residues in the printer.

Creative. Free of charge. Easy.

That's how easy it is:

- ▶ Choose your favourite design
- ▶ Insert text and - if desired company logo
- ▶ Print and done!

It is not always easy to be well organised all the time.

Avery Zweckform offers you the perfect label solution for an easy, quick and professional labelling of your folders, files and documents.

RECYCLED LEVER ARCH FILING LABELS

for all A4 printers

- Off-white Lever arch filing labels are made from 100% recycled paper, certified with the eco-label "Blue Angel"
- Labels are chlorine free-bleached and contain a water-based adhesive
- Trouble-free printing for laser printers tested and certified by TÜV SÜD

ANNA'S TIP!

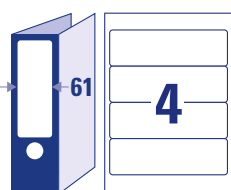

To have a particularly clear structure in your filing system, why not use our coloured filing labels? If you always choose the same colour for the same topic, you will have an even better overview over your files. You will be more organised and the office will be brighter, too! Alternatively choose always the same colour for each year.

By the way, the long-format, coloured filing labels offer more space for a clear and clean labelling without the disturbing producer logo.

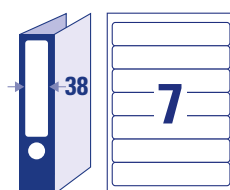

Visit www.avery-zweckform.eu/print to find free templates & software for easy and quick designing

PROPERTY &
SECURITY

Label your company property reliably and professionally - with the especially developed hard-wearing labels. They are also perfect for labelling stock and inventory. Create your own labels whenever you require any!

INVENTORY LABELS WITH LAMINATION for handwriting

- Label and writing are perfectly protected by the applied lamination
- Simply write on label, remove the carrier paper from the lamination and apply
- Resistant to water, oil and cleaning- and disinfection agents and solvents
- For easy on-site hand labelling. Labelling with marker or ball pen
- Ideal for the permanent labelling of inventory and property
- In a practical dispenser bloc

NOPEEL™ INSPECTION LABELS for laser printers

- Made from tamper proof document film
- Label disintegrates into small pieces when an attempt is made to remove it, making a label transfer impossible
- Manipulation attempts are clearly visible
- Ideal for security labelling of inventory and property
- Resistant to water, oil, cleaning- and disinfection agents and solvents
- Free templates at www.avery-zweckform.eu/print

Art No.	Format mm (B x H)	Description	Colour	Labels/Pack	A4Sheet/Pack	Printer I L K CL
NEW 1 L7801-10	Ø 20	NoPeel	○ white	480	10	• •
NEW 2 L7802-10	Ø 30	NoPeel	○ white	240	10	• •

NoPeel Film:
Disintegrates into small pieces when an attempt is made to remove it

REMOVABLE INSPECTION LABELS for laser printers

- Made from weatherproof and extra durable polyester film
- Labels are strongly adhesive, but easily removable without leaving any adhesive residues.
- With peel-off tab
- Tearproof, water, oil, dirt, UV and temperature resistant form -20°C bis +80°C
- Ideal for security labelling of inventory and property
- Free templates at www.avery-zweckform.eu/print

DVD LABELS

SuperSize

- DVD Labels with unique safety perforation: Labels use a special film material resistant to temperature changes for optimum performance
- With the practical, removable wings you can easily centre labels
- SuperSize DVD labels cover the DVD surface including the transparent middle

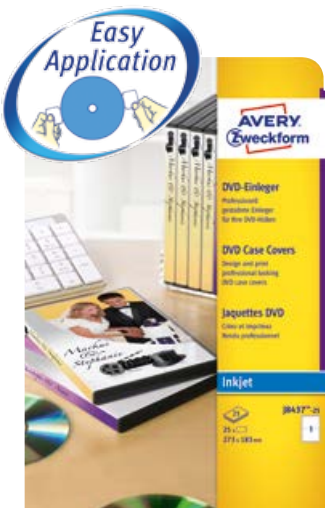

Playing equipment and blanks used for DVD technology are generally more sensitive than CD technology. The data tracks are closer together and so the laser has to read more accurately. Avery Zweckform therefore recommends DVD-optimised labels.

PRINTER TECHNOLOGIES

Colour Laser

Toner is transferred to the paper with electrostatic charges and fixed on the paper with pressure and heat (temperature up to 200 °C).

INTRODUCTION TO COLOUR LASER PAPER

Get the best out of your colour laser printer!

Your colour laser printer is a high-tech product.

Therefore you need special materials that are specifically tailored to its high-tech requirements to achieve optimal printing results: the colour laser paper from Avery Zweckform. Its heat resistance and special surface properties are gentle on sensitive device components and guarantee best print quality.

- Professional: Intensive colours and pin-sharp images
- Reliable: High heat resistance for jam-free printing
- Compatible: suitable for all standard colour laser printers and copier

For best printing results and toner adhesion please note:

- 1) Choose "cardboard" in the printer settings. Depending on supplier there are different terms: thick paper, labels etc.
- 2) Always feed via single sheet feeder.

COLOUR LASER PAPER QUALITY LEVEL

Which paper substance should you choose?

Usage is the key criteria for selecting the correct substance. Higher substances are generally regarded as higher quality and are suited to high-quality documents in particular. Lower substances are usually perfectly adequate for day-to-day use.

PRINTER TECHNOLOGY

Inkjet printer

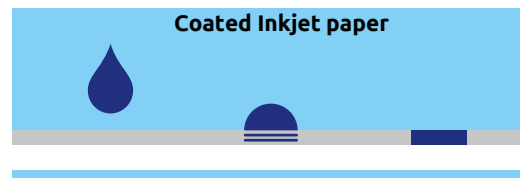

Ink drops are fired towards the paper surface. Quick drying time and high ink absorption of the coating is key in producing excellent print results.

PAPER COATING FOR INKJET PRINTERS

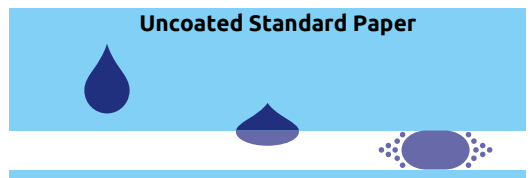

Special inkjet paper has a particularly good ink absorption capacity. The special surface coating binds the ink with precision and guarantees quick drying. This enables managed ink application for excellent colour printouts with sharp contours – unlike Uncoated paper where ink usually runs uncontrollably.

Coated paper

Precision ink application

Uncoated paper

Uncontrolled ink application

Micro porous special coating

Porous cover layer
Image layer
Ink fixing layer
Whiteness control layer
PE coating
Paper body
PE coating

High tech paper
7-layer structure
for excellent photo printouts

What does “instant dry and smudge free” mean?

All inkjet paper and inkjet photo-paper from Avery Zweckform is immediately dry and wipe-able after being printed, i.e. the colours are embedded in the coating and the paper can be removed from the printer without any smudging. You should wait a few hours before using the paper again however, such as when inserting it into transparent sleeves or sticking it into a photo album – this is because the water contained in the ink must fully evaporate first.

Important to know when printing and processing

The coated side is always at the top in the pack – a note to this effect is on the pack. It is also whiter – carefully bend over the front side and you can see the difference immediately. The coated side of most photo paper is also usually glossy.

Insert the paper in such a way that the coated side is printed on. That might vary in the different models. Select the correct material in the printer menu, depending on the manufacturer the terms are different.

For photo paper:

- Glossy photo paper
- Premium glossy paper

For matt paper:

- Other inkjet papers
- High resolution paper
- Photo quality inkjet paper

INKJET PAPER QUALITY LEVELS

Which paper substance should you use?

Usage is the key criteria for selecting the correct substance. Higher substances are generally regarded as higher quality and are suited to high-quality documents in particular. Lower substances are usually perfectly adequate for day-to-day use.

TRANSPARENCIES COATING

Different printer technologies require different types of transparency coatings. For example, the inkjet transparency requires a coating to absorb ink.

Laser and copier transparencies are either coated or uncoated. Whilst uncoated transparencies simply appear more transparent, coated transparencies are the better solution regarding feed, pass-through characteristics, antistatic capabilities, density and toner adherence. Laser printers and copiers apply and fix the toner with heat and pressure. Only by using coatings specially designed for inkjet or laser technology perfect results can be achieved - photo realistic visuals and pin-sharp images.

- Coated on one side:**
 - All inkjet transparencies
 - All laser- and copier transparencies with sensor strip or backing paper
- Coated on both sides:**
 - All laser- and copier transparencies without sensor strip or backing paper

OPTICAL PASS-THROUGH

Printer with an optical pass-through control only identify the printing material when it is not transparent. Transparent printing material can not be fed. That's why transparencies are equipped with a white sensor strip that can be removed after printing.

The sensor strip is either on the short side (particular for printers) or on the long side (particularly for copiers) depending on how the printer feeding is done.

OTHER SPECIAL FEATURES IN THE TRANSPARENCIES RANGE

- Multi sheet feed:** Virtually all transparencies can be fed in a stack into the printer, i.e. they can be placed in the feed tray of your printer and do not have to be inserted individually.
- Antistatic:** Transparency material can become statically charged. This can cause problems in laser printers and copiers because they also work with static charging when printing. The special coatings for laser and copier transparencies prevent any unwanted static charging of the transparencies.
- Heat resistant:** Laser printers and copiers fix the toner at about 180-210°C. The melting point of polyester is around 267°C. There are transparencies with a thickness between 0.1mm and 0.2 mm depending on application and printer. The general rule is "the thicker a transparency is, the higher its quality". Thicker transparencies are more suitable for printers that fix the toner at higher temperatures (such as HP printers).

AVERY ZWECKFORM TECHNOLOGY

Quattro Clean Technology

QCT means: no more adhesive residues in the printer and no more expensive cleaning of the devices. The transparent, self-adhesive transparencies (3480/3482) are equipped with the QCT edge developed by Avery Zweckform. This 4-sided levelled edge prevents adhesive leaking in the printer.

Brilliant colours

The logo „Brilliant colours“ stands for photo realistic inkjet printouts, vibrant colour intensity, high resolution and quick colour absorption.

TRANSPARENCIES

TRANSPARENCIES FOR LASER
PRINTERS AND COPIERS

SELF-ADHESIVE TRANSPARENCIES

- 10mm pre-printed grid on backside for easy cutting
- Easily removable due to lengthwise split on the backside
- Short term re-positionable thanks to the semi-permanent adhesive - allows accurate fitting into existing documents without any difficulty
- Matt surface, excellent to write on, even by hand
- Ideal for the duplication of symbols, logos and graphics

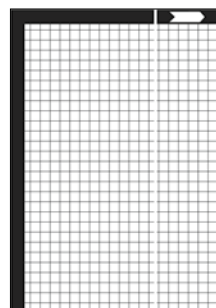

Art No.	Format DIN	Description	Multi sheet feed	Thickness transparency	Content	Printers I L K CL
3480	A4	Coated, for b/w laser printers, b/w copiers and colour laser printers	•	0,14 mm	100	• • •
3482	A4	Coated, for b/w laser printers, b/w copiers and colour laser printers	•	0,14 mm	25	• • •

Quattro Clean Technology

QCT means: no more adhesive residues in the printer and no more expensive cleaning of the devices. The transparent, self-adhesive transparencies (3480/3482) are equipped with the QCT edge developed by Avery Zweckform. This 4-sided levelled edge prevents adhesive leaking in the printer.

Backside 3480/3482

The black edge ensures hassle-free printing in devices with optical pass-through control.

WHITE, WEATHERPROOF TRANSPARENCIES

- Non-yellowing feature perfect for long term archiving
- For heavy-duty and hard-wearing documents
- Water resistant
- Temperature resistant
- Dust-free

Art No.	Format DIN	Description	Multi sheet feed	Thickness transparency	Content	Printers			
						I	L	K	CL
3487	A4	coated, for b/w laser printers, b/w copiers and colour laser printers	•	0,12 mm	100	•	•	•	•

LASER TRANSPARENCIES FOR PRINT MASTER PRODUCTION

- Milky-transparent for improved exposure
- For diverse applications, such as designing of greeting cards and flyers
- Simple, cost effective and quick creation of films for print master production, such as for flyers, menus...

Art No.	Format DIN	Description	Multi sheet feed	Thickness transparency	Content	Printers			
						I	L	K	CL
3491	A4	Transparent, matt coating, for b/w laser printers	•	0,10 mm	100	•			

That's how it works:

1 Design (text, image) with your own software on your PC.

2 Insert the special matt coated transparency into the feed tray of the laser printer. Start printing - done!

3 Print shops can then assemble your film in a print master with which they can create the printing plate. Now the printing can start.

TRANSPARENCIES

TRANSPARENCIES FOR
INKJET PRINTER

OVERHEAD TRANSPARENCIES

- Special inkjet coating for brilliant colours, photo-realistic pictures and pin-sharp visuals
- Quick colour absorption prevents the ink smearing and running
